

I live in San Antonio, Texas and travel to the Dallas Fort Worth Area quite often. I shouldn't have to wait to hear weather reports because of commercials. If I am willing to pay for a service that benefits the consumer greatly, why should I have that taken away because rich radio owners want to remain in the 50s and never change. Weather is a safety concern. SAFETY FIRST. Just like seat belts laws are neccessary, we should have the option to know whats going on with driving conditions in a timely manner.
